CASE STUDY

INUKO

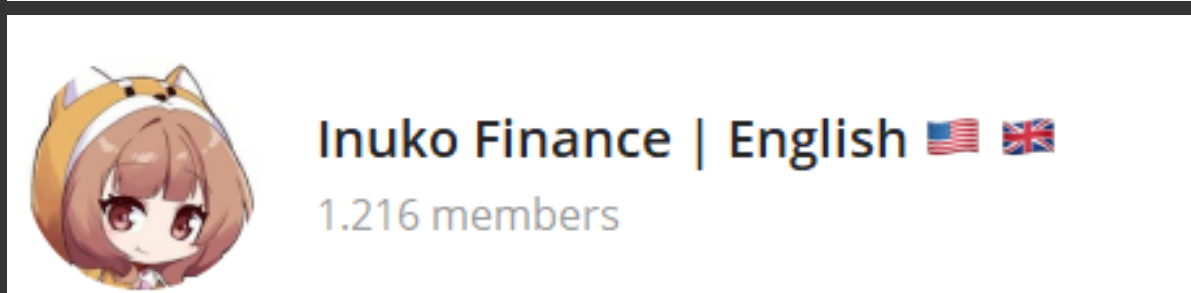

From 0 users to over 1,400 users in the DACH region, from 0\$ to 7 million \$ market cap within a few weeks.

Despite resistance and hate, we have made INUKO one of the most popular projects in the DACH region.

Even when the token price dropped, we continued to work, attend trade shows and build great partnerships. Now there is an INUKO buyback of 0.62\$ per INUKO, due to the good work of the whole INUKO community.

here we started great marketing offensives for INUKO

Almost all influencers who had even a little to do with web3 reported on INUKO and invested in the project themselves to a large extent.

Several projects approached us and wanted to cooperate with INUKO.

We chose only watertight projects, like Wizardia and Liquidus.

One of the biggest P2E games and a wallet that supports users in staking.
